## **Project Description**

### Principal's Priority

2

Technology Update: Now that we are operating on a new software system, we are in need of updating our software, updating our server and increasing our student accessibility of technology. We are in need of more computers and learning software. There are many computer-based multi media programs that enhance learning.

#### **Benefits if Project is Funded**

Teachers will be able to enhance lessons using appropriate technology and software-guiding students on the internet or other technological operation on the computer. It will also save time on instruction when all students have access to the same information at the same time.

# Impacts if Project is not Funded

Technology lessons would continue without the full benefit of having a variety of computers and computer software at their fingertips.

# of Students impacted by project 330

Project Start Year 2010
Project Finish Year 2010

Project has matching funds are available

Project has prior state funding available

No

Project has federal funding available

No

Project has has a public review process Yes Capital Request Advisory Committee
